VPS Hosting

[Linux VPS Tier1](#)

[Windows VPS](#)

Linux is the traditional VPS web hosting platform, that is extremely reliable and robust. Our most affordable and reliable VPS hosting packages are Linux based, with prices starting at only \$5.95 per month! Available operating systems include: CentOS, Debian, Ubuntu, Fedora, & Gentoo. Control panel software is optionally available on all Linux VPS hosting accounts, including; - CPanel, DirectAdmin, & Plesk. Our Linux VPS hosting accounts currently run on the vePortal platform.

Windows 2003/2008 Server VPS hosting provides specific options not available on our LINUX hosting platforms, such as ASP, MS-SQL, MS-Access, .NET, Framework, and ASP.NET. Windows 2003/2008 Server VPS hosting, as opposed to Linux VPS hosting, is only advantageous if you require one or some of the features listed above. Plesk, the Windows control panel software, is optionally available on all Windows 2003/2008 Server VPS accounts. Our Windows 2003/2008 Server VPS hosting accounts currently run on the SolusVM platform
